

RiverSafe RainBarrel

The **RiverSafe** RainBarrel is easy to install, maintain and is suitable for almost any property size or location

The easy way to harvest rainwater at home!

Use a RiverSafe RainBarrel to:

- Stop stormwater from running off your property
- Water your garden with chlorine-free rainwater
- Conserve potable water and save money
- Reduce energy used to treat and pump municipal water
- Help restore the natural water cycle in the city

A 500sqft roof (46m²) can collect as much as 460L (121G) of useable water during a standard rain fall ! Making our barrel the perfect size.

Stormwater picks up pollutants and debris as it runs-off your roof, sidewalk and driveway, carrying them to our streams, rivers and lakes.

Protect our waterways by keeping rainwater on your property with a RiverSafe RainBarrel

Available in:

\$249
